

Dear Bill,

1/5/95

Thanks for your 1/3 and the stamps and picture of the memorial stone in it. I think the stone is fine and we appreciate the stamps that Bill will use because she can twist and turn to reach them easier than I. I use rolls in a container and I can reach them from where I sit to write.

The book I'll need to reprint soon is the first Whitewash. It has a binding like Oswald in New Orleans and if your copy doesn't your daughter's does. That will give your friend an idea of the thickness, too. Whitewash is actual size because it was then possible for me to have a master made. I could not with Oswald.

I think Brown's Treachery in Dallas is one of the more stupid, incompetent, dishonest and ignorant books in years. I'm making a record about it for the records for our history. The man is a self-important dundun with a PhD.

His prize sources are fake books. Literally fakes. And he is too ignorant to know that. It is wise if he does know it. But I think he does not.

Our rather severe weather for this time of the year continues. We have a report for another snow over the weekend. We went out and got extra medicines today not to run out when we should not go for them. Also a bit of extra food.

I've heard nothing from Doug and I've written Hal to expect the copy if the ms whenever it is copied.

Now for the rest of mail.

Thanks and best wishes,
